Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

The TwinWest Chamber of Commerce is an association of small and large job creators in the western suburbs of the Twin Cities metro area in Minnesota. We seek to foster economic development, support our communities, and grow the entrepreneurial spirit in our region and state.

New technologies, and hyper-fast communication tools, help our members and their employees to unleash their own skills and attributes, and create new jobs and small businesses throughout the region. Our policy makers should do whatever it takes to help create an environment where technology and communication is allowed to flourish.

TwinWest believes in a competitive market place. We see this business transaction as a path towards more investment in hyper-fast wireless broadband, and all of the benefits that come from a mobile and smartphone app led business environment that offers so many exciting prospects.

We have members from global leaders in value added agriculture, to small Realtors and main street retailers. Regardless, we all benefit from the growth of hyper-fast wireless broadband. The FCC has a component of that development in front of it now, and we encourage to you approve the merger between AT&T and T-Mobile quickly and efficiently.

Thank you in advance,

Judy Johnson
Director of Government Affairs
Twin West Chamber of Commerce
